

# Discrete Maths

6

Output symbols in FSTN

over  
state

over

transition edge

Upon  
entry

Upon  
exit

P.S. Moore vs Mealy

~~Draw FSTN~~

for

~~1's complement.~~

$\Rightarrow$

Output  
over  
state

A/0

When do you  
dispatch output.

~~One minute~~  
on entering  
into?

on exiting out?

start state output  
as soon as we enter.

Example

For ~~language~~

write

$$L = \{ a^i b^j \mid i \geq 1, j \geq 1, i \neq j \}$$

grammar or Fsm

Observations

(1)

i	j
1	1
1	2
1	3
	⋮
2	1
2	2
2	3
	⋮

i	j
1	1
2	1
3	1
⋮	⋮
2	2
2	2
3	2

a b

a a b b

(2)

All a's must precede all b's

③  $i > 1, j > 1, i \neq j$

$aab$  or  $abb$

first possible strings

---

Can we think "dead state"

If input starts from  $b$

or after ~~so many~~  $a$ 's ~~1st  $b$  and then~~  
 $a$  again

How will you solve?

Think Simple

Override task

$i \neq j$  into two

possible?

How?

$L_1$

$i > j$

$L_2$

$i < j$

$L_1 \cup L_2$

$i \neq j$

L1  $i > j$

$S \rightarrow C$

$C \rightarrow cb$   
 $C \rightarrow ab$   
 $ab \rightarrow aab$   
 $ab \rightarrow ab$

L2

$i < j$

Total 10 rules

$L_1 \cup L_2$

$i \neq j$

Simplified

$$S \rightarrow A$$

$$S \rightarrow C$$

$$A \rightarrow aA$$

$$A \rightarrow aB$$

$$B \rightarrow aBb$$

$$B \rightarrow ab$$

$$C \rightarrow cb$$

$$C \rightarrow Bb$$

Total  
8 rules.

# Behaviour of student Input

	Homework	Party	Poor Exam
<del>Happy</del> A	A	A	B
Angry B	C	A	B
Upset C	C	A	C

A	output	✓ Psychologists
B	SING	✓ Sociologists
C	CURSE	✓ Economists
	SLEEP	✓ Scientists
	to use	etc FSM to model.

## Exercise

Give a type-2 grammar for

$$L = \{ a^i b^j c^k \mid i \geq 1, j \geq 1 \}$$

Also, validate strings

~~aaag~~

aaabC

aaabbbccc

etc.
