

# Learning from implementation - 2

Prof. Jigar Pandya • Mar 2

Possible user input names may be supported with auto generated to chose.

About presentaion, use stopwatch and practice in a team.

Sorting, dowload, email, share like features are common. Support differnetly within different pages.

Dont offend team spirit ever. Be extremely cautious.

If you are supporting logs, cookies, etc. Make sure to provide information about the same on GUI.

Look for trust certificates, https, page ranking, site enablement for differently enabled person i.e. assistive tech. cmmi levels. etc.

Motivation:

It is not of much importance that project works, its about how it technically works.

You must be satiesfied with your work. If not keep working hard.

ToDo:

Spend a day to write comments in every module source files.

And commit.

Think of future work, extensions, limitations, scalability concerns and document a chapter.

## Class comments
