

Lab2 - Develop programs to solve following problems using greedy strategy: (a) Fractional Knapsack Problem (b) Making Change Problem.

Prof. Jigar Pandya • 3:04 PM

There are variations of Knapsack Problem. For now think of what variations are possible and what challenges will it bring in terms of data structures and processing.

Same way making change problem can also be seen with different constraints.

HackerRank link posted here are for reference purpose only. Or you may use the platform as needed.

Final submission to be done with google classroom assignment turn in way only.
