Instructions   Student work

Automated Testing and Integration API Development

Prof. Jigar Pandya • Mar 2

Due Mar 15

Testing_CE001_CE002_CE003.docx (Replace numbers in sorted order of all team members)

Auditing support with logs and reports.
Automated testing support using selenium like tools or JUnit, etc.
Web services like interfaces/integrations.
Other modules development.

Create test case and have pass status for all after verifying the same. These test cases must match to SRS requirement ID. Note that one requirement ID can have multiple test cases.
